Coppertone (23)

Titanium (35) ●

Silversmith (28) ◆

Brite Red (17) ●

MATTE FINISH

70% PVDF resin based coatings, as noted above, designed to simulate natural metal hues in a high performance paint system.

NATURAL METALS

Due to their beauty, durability and time-proven performance, natural metals are a preferred material used in architecture. Natural metals will weather and patina naturally over time, adding character and aesthetic appeal to any building design. In addition to natural metals, We offer 55% Al-Zn alloy coated steel with acrylic coating and anodized aluminum as standard available materials.

WOODLAND SERIES*

Add the warmth of wood with the durability of metal to your next project. We offer four classic woodgrain patterns with a 70% PVDF coating. Available in .032 aluminum.

OXIDE SERIES*

Made to look like weathered steel, combine the aesthetic appeal of aged metal with the advantages of brand new metal cladding with a 70% PVDF finish.

LAMINATES*

We offer a stacked stone laminate pattern. Our laminate is UV stable for exterior wall applications.

* Special material. Pricing and availability dependent upon project specifics. Color chips available upon request.

Stainless steel products provided by ROOFINOX®. Colors are as close to the actual colors as modern printing allows. Metal color chips are available on request (this is a requirement for all premium colors) and should be used for final color selection. If you have requirements or preference for colors or finishes other than shown, please contact us. Color availability varies by material, gauge and profile. We reserve the right to modify, eliminate and/or change our products without prior notification. All colors are produced under stringent guidelines and tolerances that are identified within the coated metal industry. Batch to batch variations may occur within these established industry tolerances. Care should be exercised by customer when mixing lots. Contact us for more information.
