

Replacement Doors For Walk-Ins

What's Old Is NEW Again!

When one door closes another opens...

If your walk-in door does neither, get CrownTonka by Everidge.

Before

After

Does the door on the left look familiar?

Cooler and freezer doors really take a pounding from hand trucks, forklifts, pallet jacks, ice buildup and everyday use. Damaged and ill-fitting doors compromise cooler and freezer efficiency, promote the growth of harmful bacteria, reduce operational efficiency, and create a health & safety hazard.

CrownTonka replacement doors reduce energy costs, counteract bacterial growth, improve access, and prevent workplace accidents. CrownTonka replacement doors are designed to fit other manufacturers' coolers or freezers. Ordering and installation is simple!

HEALTH & SAFETY

- Prevent workplace accidents
- Improve operator efficiency
- Avoid unsanitary conditions

COST SAVINGS

- Reduce energy usage
- Extend product life of perishables
- Fast ROI

SIMPLE INSTALLATION

- Pop out the old
- Pop in the new
- Fits any manufacturer's walk-in

Our offering includes made-to-order quick ship standard doors as well as made-to-order custom doors.
